## 2013 Apple Variety Showcase

**Variety: Linda Mac**

**Other Names:** Bull McIntosh cultivar

**Type:** McIntosh

**Description:** Whole tree mutation in Red McIntosh orchard in Casnovia, Michigan. Colors earlier than original with early stripe that fills out to solid blush, ripens at same time as original. Ripens 20 days earlier than Red Delicious.

**Variety: Snappy Mac**

**Other Names:** Gunnison

**Type:** McIntosh

**Description:** Medium dark red blush.

**Variety: Ruby Mac**

**Other Names:** Thome McIntosh

**Type:** McIntosh

**Description:** Limb mutation found by B. Thome in Red Max orchard. Early coloring, blush, more color than Linda Mac. Ripens 20 days earlier than Red Delicious.

**Variety: R & S 2009A**

**Type:** McIntosh

**Description:** Mac limb sport.

## 2013 Apple Variety Showcase

### **Variety: SPA365**

**Type:** McIntosh

**Description:** Sinta X Jonamac. 70% attractive smooth blush cherry red on yellow/green, smooth skin, some russet, 2 ¾ to 3 1/4", round/slight oblate, long storage, productive, sweet with some acidity, somewhat Jonathan and Mac like flavor, white/slight cream, mac-like habit. Ripens 3 days after Red Delicious.

### **Variety: Supermac**

**Type:** McIntosh

**Description:** McIntosh X PRI 674, Quebec breeding program. Scab resistant, similar to Spartan, larger, longer storage life, round, medium-large, sometimes lopsided, white flesh, resistant to fruit crop. Ripens at the same time as Red Delicious.

### **Variety: Belmac**

**Type:** McIntosh

**Description:** Ottawa 521 x Spartan. Scab resistant, large apple, mac-like, smooth, thick skin, red with green stripes, white flesh with touch of green, firm, coarse texture. Ripens at the same time as Red Delicious.

### **Variety: Eden**

**Other Names:** SJCA38R6A74

**Type:** McIntosh

**Description:** Scab resistant, Quebec breeding program. Ripens at the same time as Red Delicious.

## 2013 Apple Variety Showcase

**Variety: Redcort**

**Other Names:** Nicklin

**Type:** Cortland

**Description:** Cortland type, shy bearer, attractive 90% purplish red color with red stripe earlier, no russet, matured in late September, if picked green has tendency to scald. Ripens 10 days after Red Delicious.

**Variety: Royal Empire**

**Other Names:** Teeple Red Empire

**Type:** Empire

**Description:** Early strain of empire. Limb sport of Empire, fruit has solid red blush, but more stripe than TF 808; early coloring, more coloring than standard. Similar to empire in all other aspects. Ripens 4 days after Red Delicious.

**Variety: "Redcourt Sport"**

**Type:** Cortland

**Description:** Not official name, dark red, mainly blush type. Ripens 2 days earlier than Red Delicious.

**Variety: Thome Empire**

**Other Names:** TF-808

**Type:** Empire

**Description:** Whole tree mutation of empire. Dark red sport with no stripe, non-spur, colors better than standard Empire but is mature at same time. Ripens 4 days after Red Delicious.

## 2013 Apple Variety Showcase

**Variety: Crown Empire**

**Other Names:** Crist cultivar

**Type:** Empire

**Description:** Blush limb sport of Empire. Colors earlier and more completely than Empire, similar to Empire in other regards. Ripens 4 days after Red Delicious.

**Variety: Crimson Gala**

**Other Names:** Waliser cultivar

**Type:** Gala

**Description:** Striped red sport of Royal Gala. Sport of Royal Gala found by Kent Waliser in Oregon in 1988. Fruit is cherry red rather than dark red, lighter stripe than Royal Gala, lighter and less stripe than Buckeye Gala. Ripens 23 days earlier than Red Delicious.

**Variety: Imperial Gala**

**Other Names:** Mitchell

**Type:** Gala

**Description:** Striped sport, filled in color, colors better than Royal or standard may develop bleached appearance to the skin, later maturing, maybe better storing, good quality reputation. Ripens 23 days earlier than Red Delicious.

**Variety: Pacific Gala**

**Other Names:** Olsentwo cultivar

**Type:** Gala

**Description:** Whole tree mutation of Royal Gala. Whole tree mutation of Royal Gala discovered in 1989 by Dick and Larry Olsen, more striped than Ultrared but less than royal, darker than Imperial Gala. Ripens 23 days earlier than Red Delicious.

## 2013 Apple Variety Showcase

**Variety: Twin Bee Gala**

**Other Names:** TWI-300

**Type:** Gala

**Description:** Limb sport of Tenroy/ Royal Gala. Red stripe, slightly less color than Gale Gala, highly colored, strong stripe, slightly less stripe than Brookfield. Ripens 23 days before Red Delicious.

**Variety: Ultima Gala**

**Other Names:** Banning cultivar

**Type:** Gala

**Description:** Red mutation of Imperial Gala. Limb mutation of imperial. Ripens 23 days before Red Delicious.

**Variety: Buckeye Gala**

**Other Names:** PV1001, Peace Valley 1001

**Type:** Gala

**Description:** Limb sport of Imperial Gala. Colors full deep red with strong, stable stripe, colors much earlier and ripens approximately 1 week before Imperial. Ripens 23 days before Red Delicious.

**Variety: Brookfield Gala**

**Other names:** Baigent cultivar

**Type:** Gala

**Description:** Limb mutation of Royal. From New Zealand, pronounced dark stripes, very slight scarf skin in stem bowl. Ripens 23 days before Red Delicious.

## 2013 Apple Variety Showcase

### Variety: Hacker Special

**Type:** Gala

**Description:** Fence row seeding. Conic, Gala appearance but late, dense Stayman-like flesh, cherry ruby red slight brown blush, prominent lenticels. Ripens 3 days before Red Delicious.

### Variety: Releika

**Other Names:** Rezista Gala-Like

**Type:** Gala

**Description:** Resistant to apple scab, mildew, but mod susceptible to fire blight, mid-size, thick smooth glossy skin, solid medium dark cherry red, stem russet in bowl, firm flesh, not as sweet as gala, bitter skin, fruit pulls hard, hangs well. Ripens 5 days after Red Delicious.

### Variety: Blondee

**Other Names:** MO1040

**Type:** Gala

**Description:** Limb sport of Kidda Gala. Clear Shiny, yellow skin, some blush with inconspicuous lenticels, firm, sweet crunchy, good shelf life, slightly ribbed, Golden Delicious shaped, deep calyx. Ripens 25 days before Red Delicious.

### Variety: Galarina

**Other Names:** x-4962 cultivar

**Type:** Gala

**Description:** Gala X Florina- Quebec apple breeding program. Scab Resistant, small to medium size, conic, lobed, smooth thick skin, medium red with stripes, yellow/white flesh, bitter pit tendency, ripens shortly after Gala, better shelf life than Gala, fruit holds on tree into winter. Ripens 18 days before Red Delicious.

## 2013 Apple Variety Showcase

**Variety: Jonagored**

**Other Names:** Morrens

**Type:** Jonagold

**Description:** Limb sport Jonagold. Perhaps has more tart flavor than standard Jonagold, slight stripe, more red than standard or Nicobel, maybe slightly more red than Decoster, but less than Rubinstar, ripens ahead of standard. Ripens 10 days before Red Delicious.

**Variety: Rubinstar**

**Type:** Jonagold

**Description:** Originated at Gailberg, Germany in 1980 as a Jonagold bud mutation. Similar to conventional Jonagold except that it matures about 1 week early, and has more red at 80% with more striping, USPP 7590. Ripens 10 days before Red Delicious.

**Variety: Red Jonaprince**

**Type:** Jonagold

**Description:** Jonagold mutation. Wiltons red Jonagold strain found in the Netherlands. Early coloring and ripening (4 to 5 weeks earlier), reputed to have firmer, sweeter, and more acid fruit.

**Variety: Jonagored Supra**

**Type:** Jonagold

**Description:** Sport Jonagold. Better color than original Jonagold. Ripens 10 days before Red Delicious.

## 2013 Apple Variety Showcase

**Variety: JonaStar**

**Type:** Jonagold

**Description:** Colors six to eight weeks before maturity. Bright red with stripe. Ripens at the same time as Red Delicious.

**Variety: Resi**

**Other Names:** Rezista Early Jonathan

**Type:** Jonathan

**Description:** Not a true Jonathan, reputed to be: fruit medium to small, very productive, resistance to apple scab and bacterial canker, and tolerance to fire blight and mildew, internal browning, irregular shape, some lobes. Ripens 28 days before Red Delicious.

**Variety: Ruby Jon**

**Other Names:** BJ-809, Jackson Johnson cultivar

**Type:** Jonathan

**Description:** Limb mutation of Jonnee. Red dark skin color, smooth finish perhaps with less tendency to scarf skin, hangs like typical Jonathan, ripens a few days earlier than Jonnee, blush type like Jonared, red does not bleed into flesh. Ripens 10 days before Red Delicious.

**Variety: Northern Spy**

**Type:** Spy

**Description:** Very vigorous but slow to begin bearing fruit; 40% medium red with slight stripe on green/yellow back, alternate bearing. Fruit is large, firm, stores well, and good eating and cooking. Ripens 8 days before Red Delicious.

## 2013 Apple Variety Showcase

### **Variety: Novaspy**

**Type:** Spy

**Description:** Red Spy X Golden, Nova Scotia, C. DesLauriers prog. Globose-conical, smooth skin 30-85% striped to blushed dark red, flesh creamy yellow, fine textured, very firm, crisp, mod tender, juicy, mod acid, flavor very good, 2 weeks before Northern Spy, weepy habit, shorter storage than Northern Spy. Ripens 10 days after Red Delicious.

### **Variety: Daybreak Fuji**

**Other Names:** Rankin

**Type:** Fuji- Early

**Description:** Fuji sport. Early maturing Fuji discovered at Twin Springs Fruit Farm, Orrtanna, PA. Ripens 5 days after Red Delicious.

### **Variety: Auvil Early Fuji**

**Other Names:** Fuji 216 cultivar

**Type:** Fuji- Early

**Description:** Fuji limb sport of TAC 114. Early Blush red strain of Fuji, early coloring and maturing, nice color, good quality, productive. Ripens 5 days after Red Delicious.

### **Variety: Morning Mist Fuji**

**Type:** Fuji- Early

**Description:** Early ripening Fuji. Ripens 5 days after Red Delicious.

## 2013 Apple Variety Showcase

**Variety: Rising Sun Fuji**

**Other Names:** CG1023, Earlired Fuji

**Type:** Fuji- Early

**Description:** Limb Sport. Very early coloring and maturing, color is attractive full pinkish red, flesh is less dense than standard, more uniform shape than standard Fuji, somewhat bland in 2003 & 08. Ripens 3 days before Red Delicious.

**Variety: Desert Rose Fuji**

**Type:** Fuji

**Description:** Medium dark solid, ruby red, with blush, blush type, smooth finish, regular Fuji season. Ripens 22 days after Red Delicious.

**Variety: September Wonder Fuji**

**Other Names:** Fiero cultivar, Jubilee Fuji

**Type:** Fuji- Early

**Description:** Whole tree mutation of an early Fuji. Early true Fuji, blush type, dark ruby red color skin, medium acidity, good flavor, smooth skin, relatively dense flesh, more red than Rising Sun Fuji. Ripens 3 days before Red Delicious.

**Variety: Coe Red Fuji**

**Other Names:** Pasco cultivar

**Type:** Fuji

**Description:** Blush type, ripens with standard Fuji, pink highlight like sun Fuji. Ripens 22 days before Red Delicious.

## 2013 Apple Variety Showcase

**Variety: Banning Red Fuji**

**Type:** Fuji

**Description:** Red sport of Desert Rose Fuji. Red stripe on red background. Ripens 20 days after Red Delicious.

**Variety: Autumn Rose Fuji**

**Other Names:** Browner cultivar, Fuji Koho

**Type:** Fuji

**Description:** Selection from Nagafu 12, more stripe, regular Fuji season, nearly solid medium dull red/orange skin on yellow background. Ripens 22 days after Red Delicious.

**Variety: Aztec Fuji**

**Other Names:** DT2

**Type:** Fuji

**Description:** From New Zealand, Simpson Nurseries, pinkish-red with nice striped, so far with less russet than typical Fuji, reports of coloring 20% to 25% more than other current strains. Ripens 20 days after Red Delicious.

**Variety: Schlect Spur**

**Type:** Red Delicious

**Description:** Found in spur Red block in Yakima. Early coloring blush type Red Delicious. Ripens at the same time as Red Delicious.

## 2013 Apple Variety Showcase

**Variety: Adams Apple**

**Other Names:** Burchinal cultivar

**Type:** Red Delicious

**Description:** Limb sport of Oregon Spur. Early coloring, very dark color, mainly bluish, red delicious, Van Well exclusive, fruit characteristics of Oregon Spur Delicious. Ripens at the same time as Red Delicious.

**Variety: TO1058**

**Other Names:** Thome Cameo

**Type:** Miscellaneous

**Description:** Ripens at the same time as Red Delicious.

**Variety: Cameo**

**Type:** Red Delicious

**Description:** Chance seedling. Variable red stripe over white/slight green, fine texture, firm, long storage, round, biannual tendency, precocious, mid to late season bloom, high acidity mellows in storage, variable performance, sunscald tendency, bitter pit tendency. Ripens 15 days after Red Delicious.

**Variety: Smoothee**

**Other Names:** Gibson, Improved Golden

**Type:** Yellow Delicious

**Description:** True golden type, crisp taste and good flavor. Matures in late September in Southwest Michigan, semi- vigorous, biennial veering tendency, less russet than original Golden Delicious, PP. Ripens 5 days after Red Delicious.

## 2013 Apple Variety Showcase

**Variety: Marquis Idared**

**Other Names:** TF-806

**Type:** Ida Red

**Description:** Idea Red whole tree sport from Thome Farms, redder than standard Ida Red, otherwise similar red color skin, large size, white flesh not high acidity taste, juicy. Ripens 5 days after Red Delicious.

**Variety: Braeburn**

**Type:** Braeburn

**Description:** Late maturing, red/brown on green background, firm and crisp flesh, juicy, sweet, mild acidity, slow browning flesh, fresh market, processing, cooking, salads, long storage, young trees with bitterpit tendency, susceptible to fire blight. Ripens 45 days after Red Delicious.

**Variety: Klein Idared**

**Other Names:** SK 1060

**Type:** Ida Red

**Description:** Dark blush. Ripens 7 days after Red Delicious.

**Variety: Joburn Braeburn**

**Other Names:** Aurora Braeburn

**Type:** Braeburn

**Description:** Braeburn limb mutation, Dawes Bay, red, orange, brown skin color light shape less acid than original. Ripens 20 days after Red Delicious.

## 2013 Apple Variety Showcase

**Variety: Kumeu Crimson Braeburn**

**Other Names:** AMG 1016

**Type:** Braeburn

**Description:** Red Braeburn from New Zealand, 80 to 100% red color with a nice stripe, colors early, typical Braeburn quality and storage. Ripens 20 days after Red Delicious.
